DMK Facial

DMK is the only company in the world to utilise the beneficial effects of transfer messenger enzymes.

- Enzymes are living substances that regulate health and work with certain minerals in the body to form a natural system of antioxidants that fight corrosive free radicals.
- Properly formulated, they can remove dead protein, toxins and other effluvia from the epidermis using a process called 'reverse osmosis'.
- Where some cosmetic facial treatments may only act on the surface of the skin, DMK Enzyme Treatments works with the skin.
- The enzymes strengthen the structural integrity of the skin to create a healthy environment for cells to live and thrive in.
- DMK Enzyme Therapy exercises facial muscles and works to leave the skin feeling firm.
- It is suitable for a wide range of conditions such as ageing skin, sun damage, acne, rosacea and pigmentation.
- \$200.00 (reg \$250) this includes 30 day supply of take home Skincare

*expires 05/31/2018—Not valid with any other discounts or coupons
